SKILLS
JavaScript | Python | Flask/SQLAlchemy | Node.js | React/ Redux | Express | SQL | PostgreSQL | Git | HTML5 | CSS3 | Docker | Sequelize |

PROJECTS

One Mile More   Live Site | Github
A MeetUp lite clone for cycling and mountain biking.
- Ensured total user privacy through frontend and backend validation that allowed the user full CRUD functionality on anything they created.
- Built out a robust backend utilizing Python, Flask/SQLAlchemy to make a database that is easy to query from.
- Through React/redux I was able to implement custom modals and dynamic page rendering that made the website come to life.

DeVelp   Live Site | Github
An Angie's List clone for users to find and rate developers they've worked with.
- Using JavaScript (frontend) and python(backend) we were able to store and access user data in a quick and timely manner.
- Fully implemented Google maps api using Geocoder to dynamically display a users city/state.
- Made a custom search bar to query other users data and sort them out by city or state.

Liqr   Live Site | Github
A website for browsing and saving users created alcoholic drinks.
- Utilized the Redux store with React for predictable DOM rendering and state updating.
- Configured Node with PostgreSQL and Sequelize to validate and fetch database queries.
- Using Express and React/Redux I dynamically queried user data to display on the pages. This led to a very robust and intuitive website.

EXPERIENCE

Team Lead in self owned construction business
Jul 2020 - June 2021
- Lead a team of three other people in building out construction jobs.
- Interfaced with owners of residences to build exactly what they wanted.
- Executed duties to get jobs done in a timely manner.

Head Chef
Mugs downtown, July 2019 - April 2020
